Subject: Labadie SO2 and Meteorological Monitoring Data Summary Through July 13, 2015

Emily and Patricia:

Attached is a PDF file containing the available air quality and meteorological data from the Labadie Energy Center's ambient monitoring network. Please note that this data should be considered preliminary and was collected from the period April 22, 2015 to July 13, 2015. Such data has not been fully quality assured per the MDNR approved QAPP as it has only received Level 1 quality assurance. Ameren will provide the Air Program with monthly reports containing data that has been fully quality assured through the agreed upon QAPP procedures.

While preliminary in nature, we note that the monitored SO2 values are well below the SO2 NAAQs.

Let me know if you have any questions.
